Art Unit: 1653

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, 4-8, 12-22, drawn to methods of screening for modulators of KIF18A polypeptides, classified in class 435, subclass 18.
- II. Claims 1, 3-8, drawn to methods of screening for modulators of KLP67A polypeptides, classified in class 435, subclass 18.
- III. Claims 9-11, 23-28, drawn to methods of screening for modulators of DNA encoding KIF18A, classified in class 435, subclass 6.
- IV. Claims 9-11, drawn to methods of screening for modulators of DNA encoding KLP67A, classified in class 435, subclass 6.
- V. Claims 29-30, drawn to methods of modulating the activity of KIF18A, classified in class 435, subclass 18.
- VI. Claims 29-30, drawn to methods of modulating the activity of KLP67A, classified in class 435, subclass 18.
- VII. Claims 31-41, drawn to compositions and kits comprising modulators of KIF18A, classified in class 514, subclass 789.

The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I-VI are patentably distinct each from the other because each method has different steps and different end-points.

Inventions VII and any of Groups I-VI are related as product and process of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially

Art Unit: 1653

different process of using that product (MPEP § 806.05(h)). In the instant case antibodies may be used in any of the methods of Groups I-VI which is a totally different product than the modulators of KIF18A, KLP67A, or their coding sequences.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provision of MPEP section 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all the criteria for patentability including the requirement of 35 U.S.C. 101, 102, 103 and 112. Until an asserted product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not

Art Unit: 1653

commensurate in scope with an allowed product claim will not be rejoined, See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. section 103(b)," 1184 O.G. 86(March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include limitations of the product claim. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP section 804.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
